## About the Authors

**Maria Litvin** has taught computer science and mathematics at Phillips Academy in Andover, Massachusetts, since 1987. She is an AP Computer Science exam reader and Table Leader and, as a consultant for The College Board, provides AP training for high school computer science teachers. Maria is a recipient of the 1999 Siemens Award for Advanced Placement for Mathematics, Science, and Technology for New England and of the 2003 RadioShack National Teacher Award. Prior to joining Phillips Academy, Maria taught computer science at Boston University.

Maria has co-authored the earlier, C++ version of *Be Prepared* (Skylight Publishing, 1999) and several popular computer science textbooks: *C++ for You++: An Introduction to Programming and Computer Science*, which was the leading high school textbook for AP Computer Science courses in the C++ era, *Java Methods: Object-Oriented Programming and Data Structures*, now in its fourth AP Edition, *Coding in Python and Elements of Discrete Mathematics* (Skylight Publishing, 2019) and *Bits and Chips: Computer Science in Questions and Puzzles for Aspiring Coders* (Skylight Publishing, 2022).

**Gary Litvin** is a co-author of *C++ for You++*, the *Java Methods* series, and *Coding in Python and Elements of Discrete Mathematics* and *Bits and Chips*. Gary has worked in many areas of software development including artificial intelligence, pattern recognition, computer graphics, and neural networks. As the founder of Skylight Software, Inc., he developed SKYLIGHTS/GX, one of the first visual programming tools for C and C++ programmers. Gary led in the development of several state-of-the-art software products, including interactive touch screen development tools, OCR and handwritten character recognition systems, and credit card fraud detection software.

# Contents

**Preface** vii

**How to Use This Book** x

---

**Chapter 1. Exam Format, Grading, and Tips** **1**

- 1.1. Exam Format and Materials 1
- 1.2. The Java Subset 2
- 1.3. Tested Terms, Concepts, and Algorithms 5
- 1.4. Grading 6
- 1.5. College Credit 8
- 1.6. Exam Taking Tips 8

---

**Chapter 2. Java Features, Part 1** **13**

- 2.1. Variables; Arithmetic, Relational, and Logical Operators 13
- 2.2. Conditional Statements and Loops 22
- 2.3. Strings 31
- 2.4. Integer and Double Classes 35
- 2.5. Arrays 37
- 2.6. The ArrayList Class 44

---

**Chapter 3. Java Features, Part 2** **47**

- 3.1. Classes 47
- 3.2. Static Variables and Methods 52
- 3.3. Calling Methods 55
- 3.4. Random Numbers 65
- 3.5. Input and Output 66
- 3.6. Exceptions 68

---

**Chapter 4. Program Design and OOP Concepts** **71**

- 4.1. Program Design and Development Methodology 71
- 4.2. Inheritance 72
- 4.3. Class Hierarchies 76
- 4.4. Polymorphism 78
- 4.5. The “Class” Question 80

**Chapter 5. Algorithms** **83**

---

- 5.1. Iterations 83
- 5.2. Sequential Search and Binary Search 90
- 5.3. Selection and Insertion Sorts 93
- 5.4. Recursion 96
- 5.5. Mergesort 101

**Chapter 6. Annotated Solutions to Past Free-Response Questions** 

[www.skylit.com/beprepared](http://www.skylit.com/beprepared)

**Practice Exams 103**

- Exam #1 105
- Exam #2 137
- Exam #3 167
- Exam #4 197
- Exam #5 225
- Exam #6 257

**Answers and Solutions 289**

- Exam #1 289
- Exam #2 297
- Exam #3 305
- Exam #4 313
- Exam #5 321
- Exam #6 329

**Index 337**

**Index to Free-Response Questions 341**
