About the Authors

Maria Litvin taught computer science and mathematics at Phillips Academy in Andover, Massachusetts for over 30 years. She has been an AP Computer Science exam reader and Table and Question Leader, and as a consultant for the College Board, provides AP training for high school computer science teachers. Maria is a recipient of the 1999 Siemens Award for Advanced Placement for Mathematics, Science, and Technology for New England, the 2003 RadioShack National Teacher Award, and the 2020 NCWIT Aspirations in Computing Educator Award. Prior to joining Phillips Academy, Maria taught computer science at Boston University.

Maria co-authored the first, (C++) version of *Be Prepared for the AP Computer Science Exam* (Skylight Publishing, 1999) and eight previous Java editions. She is also a co-author, with Gary Litvin, of several popular computer science textbooks: *C++ for You++: An Introduction to Programming and Computer Science*, which was the leading high school textbook for AP Computer Science courses in the C++ era, *Java Methods: Object-Oriented Programming and Data Structures*, now in its fourth AP Edition, *Coding in Python and Elements of Discrete Mathematics* (Skylight Publishing, 2019), and *Bits and Chips: Computer Science in Questions and Puzzles for Aspiring Coders*, second edition (Skylight Publishing, 2022).

Gary Litvin is a co-author, with Maria Litvin, of *C++ for You++*, the *Java Methods* series, the fourth and later editions of *Be Prepared for the AP Computer Science Exam in Java*, *Coding in Python*, and *Bits and Chips*. Gary has worked in many areas of software development including artificial intelligence, pattern recognition, computer graphics, and neural networks. As the founder of Skylight Software, Inc., he developed SKYLIGHTS/GX, one of the first visual programming tools for C and C++ programmers. Gary led the development of several state-of-the-art software products, including interactive touch screen development tools, OCR and handwritten character recognition systems, and credit card fraud detection software.

Contents

Preface vii

How to Use This Book x

Chapter 1. Exam Format, Grading, and Tips **1**

- 1.1. Exam Format and Materials 1
- 1.2. The AP Java Subset 3
- 1.3. Tested Terms, Concepts, and Algorithms 5
- 1.4. Grading 6
- 1.5. College Credit 8
- 1.6. Exam-Taking Tips 9

Chapter 2. Java Features, Part 1 **13**

- 2.1. Variables; Arithmetic, Relational, and Logical Operators 13
- 2.2. Conditional Statements and Loops 22
- 2.3. Strings 31
- 2.4. Integer and Double Classes 35
- 2.5. Arrays 37
- 2.6. The `ArrayList` Class 44
- 2.7. Exceptions 47
- 2.8. `print` and `println` 49
- 2.9. Reading Text Files 51

Chapter 3. Java Features, Part 2 **55**

- 3.1. Classes 55
- 3.2. Static Variables and Methods 61
- 3.3. Calling Methods 64
- 3.4. Random Numbers 75
- 3.5. Class Libraries and the API 76
- 3.6. Program Design and Development Methodology 77
- 3.7. The “Class” Question 78
- 3.8. Inheritance 79

Chapter 4. Algorithms 81

- 4.1. Iterations 81
- 4.2. Sequential Search and Binary Search 88
- 4.3. Selection Sort and Insertion Sort 91
- 4.4. Recursion 93
- 4.5. Mergesort 98

Chapter 5. Annotated Solutions to Past Free-Response Questions
